Subject: RE: Terradex Alert 3315799 - United Heckathorn / Levin Richmond Terminal

Dear Mr. Quick:

DTSC has received a second Terradex Alert which shows your project occurring on the former United Heckathorn site (see map, below). Portions of this site are capped and deed restricted due to the presence of pesticide contamination in soil. According to the Terradex Alerts, the location of the proposed project is 402 WRIGHT AVE, with the nearest cross street being South 4TH Street. However, the Alert's description of the project states that the work will take place in front of the property in a 50'x100' area. DTSC needs to know the actual location of your project to determine if workers could encounter pesticide-contaminated soil and to ensure public health is protected. Please submit a map showing the actual location of your project and its extent in relation to the streets and properties in the vicinity.

Thank you for your assistance.

Subject: Terradex Alert 3315799 - United Heckathorn / Levin Richmond Terminal

Dear Mr. Quick:

The purpose of this email is to advise you that the Department of Toxic Substances Control (DTSC) has received a Terradex Alert for the proposed soil excavation and pipeline inspection/repair at or near the Levin Richmond Terminal (LRT) property. This property was

formerly the site of the United Heckathorn Company, whose operations led to environmental contamination with pesticides. United Heckathorn is a Federal Superfund site. Your project location may be in an area of the site that is capped and restricted to reduce the potential for exposure to pesticide contaminated soil. I've copied the Terradex Alert below, and the approximate location of your project is indicated by the red shovel icon.

I am contacting you for additional information to determine if your pipeline repair project is in the restricted area and, if so, to ensure that measures are put into place to protect health and safety of workers and other people at the site. I am asking for a diagram that shows the exact location of your project with respect to LRT property.

If you have questions, please contact me. I've cc'd Jim Holland at LRT and Rachelle Thompson at USEPA.
